FOR IMMEDIATE RELEASE:

Johnson Systems Inc. Announces JSI CS-DMX Series Programmable Manual DMX Control Stations

CALGARY, Alberta (November 1, 2011) - JOHNSON SYSTEMS INC. (JSI) is pleased to announce the release of the new CS-DMX series of controls. Value, power and complete flexibility in a "green", user friendly, cost-effective package! The CS-DMX Series of controls are the most capable manual "stand-alone" DMX controls available. These field programmable controls support 512 channels of DMX data with digitally adjustable fade times. Multiple stations can be daisy-chained together on the same control wire permitting multiple stations per room. Each station can be individually programmed with our wireless infrared hand-held programmer permitting any slider/channel assignments imaginable.

Detailed information on the new JSI CS-DMX Series Programmable Manual DMX Stations - including product images, product sheets and specifications - is available on JSI's website at www.johnsonsystems.com.
